Fire Safety Inc. offers a complete Fire Training Program to educate and prepare your employees on the proper techniques of fighting a fire. No matter how small or large your business is, employees should be trained on the proper use of the fire extinguishing equipment you have installed.

OSHA Regulations in the Federal Register-Sec. 1910.157 May 1995 update states: "Where the employer has provided portable fire extinguishers for employee use in the workplace, the employer shall also provide an educational program to familiarize employees with the general principals of fire extinguisher use and the hazards involved with incipient stage fire fighting."

Fire Safety Inc. instructors have experience in fire fighting and safety training. Our instructors are graduates of Texas A&M Fire School, Ansul Fire School and The University of Illinois Fire School.

THE FIRE TRAINING CONSISTS OF TWO PHASES.

Phase I is a classroom session in which instructors review the proper application techniques of portable fire extinguishers, how to identify the different classes of fire, and also deal with any special hazards you might encounter at your place of business.

Approximate time needed for Phase I is 30 minutes.

Phase II is a hands-on Training Program. Training is conducted under safe and controlled conditions on various techniques of fighting the different classes of fires. Demonstrations will include how to handle special fires, three-dimensional fires, gravity fed fires, obstacle fires, and any other unique hazards that might be present in your facility. *Approximate time needed for Phase II is 30-45 minutes.*

Our fire training seminars feature a specially designed Mobile Fire Training unit complete with all the necessary equipment for conducting Phase II of the Fire Training Program at your facility.

All employees who attend the Fire Safety Inc. training seminar receive a course certificate of completion. This certificate can be used as proof of compliance with various OSHA fire training regulations and can become part of their employment record.

Contact Fire Safety today for more information about our Fire Training Program or to set up a seminar.
